## Part -

### *Introduction*

OIML R 138:2007 was approved by the CIML during its 42nd Meeting held in Shanghai. In the meantime it was decided to amend OIML R 138 to take into consideration late comments.

### *Amendment (2009) to OIML R 138:2007 (E)*

#### *Section 2.6*

##### 2.6 Conventional true capacity

- a) For measuring container bottles and casks: Contained volume of water at a reference temperature with an uncertainty appropriate for the given purpose.
- b) For capacity serving measures: Delivered volume of water at a reference temperature with an uncertainty appropriate for the given purpose.

#### *Section 5.2.3*

##### 5.2.3 Measuring container bottles

In addition to the requirements of 5.2.1, measuring container bottles shall be marked with one of the following marks, either on the lower rim or the bottom:

- when filled to a constant level: the distance, expressed in millimeter, followed by the symbol mm from the brim to the filling level corresponding to the nominal capacity; or
- when filled to a constant ullage: the number, expressed in millilitre (ml) or centilitre (cl) not followed by the symbol  $\text{mlcl}^{-1}$  that is equal to the brim capacity.

#### *Annex A*

Annex A is an informative annex.
